

LANOLIN ALCOHOL SSR EP

Pharmaceutical Grade

Description	Lanolin Alcohol SSR EP (Pharma-grade) is a pale yellow, hard, waxy solid with practically no odor.
CTFA & INCI Designation	Lanolin alcohol
CAS #	Lanolin alcohol : 8027-33-6 Vitamin E : 59-02-9/16698-35-4/54-28-4/119-13-1
EINECS #	Lanolin alcohol : 232-430-1 Vitamin E : 200-412-2/240-747-1/200-201-5/ 204-299-0

Acid value (mg KOH/g)	2 max.
Melting point (°C)	56 min.
Loss on drying (1 hour @ 105°C) (%)	0,50 max.
Ash (sulphated) (%)	0,10 max.
Saponification value (mg KOH/g)	12 max.
Hydroxyl value (mg KOH/g)	120-180
Peroxide value (méq)	15 max.
Cholesterol content (%)	30 min.
Water absorption (%)	200 min.
Alkalinity	meets EP-USP
Colour (Gardner)	10 max.
Vitamin E (ppm)	200 max

Lanolin Alcohol SSR EP is the super refined unsaponifiable fraction of lanolin comprising a mixture of Cholesterol, Lanosterol, Agnosterol and their Di-hydro Derivatives plus straight and branched chain Aliphatic Alcohols.

Lanolin Alcohol SSR EP is de-odorized and full complies with current European Pharmacopeia.

Lanolin Alcohol SSR EP is initially produced as a standard lanolin alcohol produced by the alkaline hydrolysis of wool-grease and is the final product of a complex molecular distillation matrix to remove components which affect water absorption properties but which also significantly increases cholesterol content.

Lanolin Alcohol SSR EP is a light yellow waxy solid being used for both W/O and O/W emulsions. It is used in many applications including skin creams, sport creams, baby creams.

Lanolin Alcohol SSR EP offers noticeable benefits in terms of

- Increased cholesterol content
- Pale colour
- Excellent water absorption properties
